FYP
FINAL YEAR PROJECT
SHOWCASE 2026

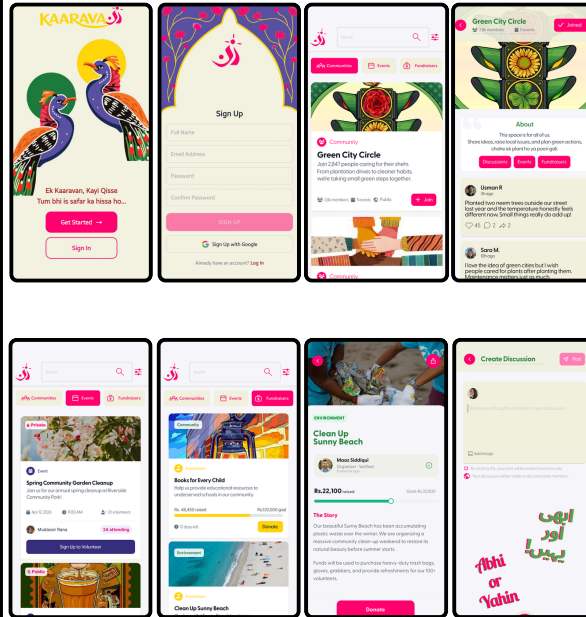

PROBLEM STATEMENT

Social groups and volunteers use many separate platforms to organize causes, events, and donations.

This makes it hard to find trusted fundraisers, coordinate people, and see how donations are used, which reduces participation and impact.

OUR SOLUTION

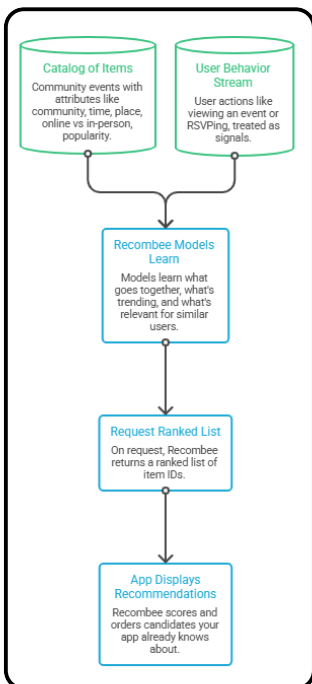

OUR JOURNEY

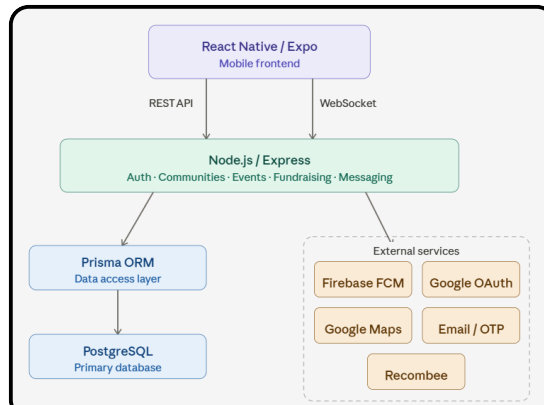

Built brick by brick over a 10-month journey, Kaarvan evolved from an idea into a community-driven platform.

AI-POWERED RECOMMENDATION

ARCHITECTURE DIAGRAM

CORE MODULES

FUTURE WORK

- Integrate Switch or Payfast for secure in-app donation processing
- Publish on Google Play Store and Apple App Store
- Build a web-based admin dashboard for NGO management

CONCLUSION

Kaarvan demonstrates that a unified, mobile-first platform can meaningfully bridge the gap between Pakistan's social sector stakeholders. By combining real-time communication, transparent fundraising, AI-powered discovery, and community management in a single app, Kaarvan lays the foundation for more connected, accountable, and impactful community-driven initiatives.
